

Simple, Powerful Digital Signage Technology

Bring your retail location to life. Use the CipherTV DS to promote your digital messages alongside streaming video or TV. CipherTV Digital Signage makes it easy to maximize in store promotions that increase sales and loyalty.

Instantly convert any monitor into a digital sign

Plug in the CipherTV DS to an existing TV, digital monitor or projector with HDMI or RCA cables to instantly transform it into a digital signage terminal. The CipherTV DS's powerful graphics processor provides crisp resolution for all screen sizes and is compatible with touch screen displays.

Digital Signage Key Functions

No.	Functions

7	Fixed or looping pictures with title shifting from right to left

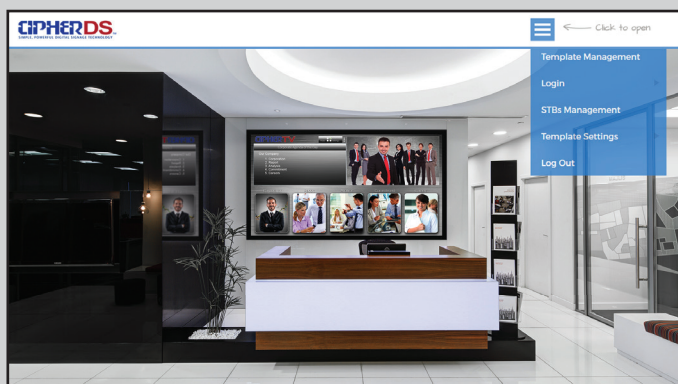

Digital Signage

Bring your retail location life

Customized Styles and Themes Designs

The CipherTV DS system provides the flexibility to change the UI color scheme in order to match a particular brand or location style. Adjust colors, logos, images and content from the convenience of the CipherTV DS online management system.

Remotely manage your locations online

Access our online management system anytime to create or change content in real-time. Manage multiple screens and locations with the same content, or create unique messaging for each individual digital sign.

Digital Signage Technology Features

- Manage a network of hundreds of locations through a single online interface.
- Connect many screens to a single device using HDMI splitters.
- Ability to stream live feeds or TV channels (content delivery restrictions apply)
- Email/password login authentication on each device-easily switch messaging by changing device login setting.
- Internet connectivity using wifi or ethernet provides remote management capability, or run a preconfigured local device without internet.
